EDUCATION

Tufts University, Medford, MA May 2024
Bachelor of Science in Computer Science, Cognitive and Brain Science
GPA: 4.0, Summa cum laude, Dean's List

International School Bangkok, Nonthaburi, Thailand June 2020
High School Diploma, International Baccalaureate Diploma
GPA: 4.5, High Honor Roll; IB Score: 43

SKILLS

Languages: Proficient in Spanish

Programming Languages: C, C++, Go, Java, JavaScript, Python, PHP, R, Swift

Software: Github, Microsoft Excel, AWS (S3, EC2, ECS, SNS), R Studio, Xcode

Other Tools: HTML5/CSS, jQuery, React, Node.js, MySQL, AJAX/Fetch APIs, SQL and NoSQL (MongoDB) databases

PROJECTS

Wordle Solver Web App August 2022

- Designed a web app (wordle-solver.onrender.com) that offers solutions to the game *Wordle* using Node.js, a MongoDB (NoSQL) database, and Render for online deployment.

Image Compressor, Machine Structure and Assembly Language Programming, Tufts University March 2022

- Using C, built a lossy color image compression/decompression program based on JPEG.

Marketing Proposal, Public Relations and Marketing, Tufts University December 2021

- Designed and presented a marketing and positioning strategy for On's Cloudbrock Edge hiking boot after extensive market research, edited a 30-second accompanying video advertisement.

EXPERIENCE

Amazon, Seattle, WA June 2025 - Present
Software Development Engineer I, Creator Experiences / Influencer Storefront

- Designed and shipped a memory optimization for mobile Storefront that mitigates app crashes caused by large content feeds, improving customer experience for millions of users.
- Delivered major feature work for a new content type (Media List) which was unveiled by the iconic Demi Lovato at the 2025 Amazon Creator Summit.

Amazon Web Services, Seattle, WA September 2024 - May 2025
Software Development Engineer I, Elastic Container Service Cluster Management

- Led performance load testing for a critical JDK migration for ECS's monolithic core backend service which handles millions of container orchestration requests; build a reusable simulated-capacity framework adopted across the org.
- Implemented key features for ECS Managed Instances feature, coordinating cross-team dependencies and conducting fixes following security-focused penetration testing.

Amazon Web Services, Seattle, WA May 2023 - August 2023
Software Development Engineer Intern, Elastic Container Service Agent

- Developed a performance testing framework for the Elastic Container Service (ECS) Agent to detect performance issues that only arise over long-term contexts.
- Integrated an automated performance test that monitors the Agent, cutting a ticket if a memory leak is detected.

Tufts University, Medford, MA September 2022 - December 2022
Undergraduate Teaching Assistant, CS-0020 Web Programming

- Graded assignments, provided feedback and guidance for students learning the fundamentals of front-end and back-end web programming.
